## Azett – Bact Ex® disinfectant and disinfectant cleaners

The new Azett **Bact Ex®** series is a ready for use and quick-acting disinfectant with a wide effective spectrum against bacteria and yeasts. **Bact Ex®** is exceptionally well-suited for surface disinfection and hand disinfection in the food, feeding stuff and veterinary sector and in public institutions as an algacide and disinfectant.

Azett **Bact Ex®** products are especially characterised by their broad antimicrobial range of efficacy. They are quick-acting and easy and universally applicable through their clear labelling.

Our product series is available with and without perfumes depending on the application area. The **Bact Ex®** series is cost efficient and at the same time economically effective. The different variations of **Bact Ex®** are water-soluble and can be used as concentrate or in the ready for use dilution depending on the area. **Bact Ex®** is a ready for use and quick-acting disinfectant with a wide effective spectrum against bacteria, yeasts and viruses.

The **Bact Ex®** disinfectant / disinfectant cleaners feature especially brilliant cleaning properties and are environmentally friendly as well in use as in the waste management. Additionally the product was designed to have a low CO<sub>2</sub>-impact in the supply chain.

The Azett **Bact Ex®** series has a very good corrosion resistance and corrodes neither instruments nor metallic surfaces and does not corrode cloth, rubber, synthetic or other materials.

**The Bact Ex® series disinfectants / disinfectant cleaners are CLP label-free**

- ✓ Free of ethanol, 1-propanol, 2-propanol
- ✓ QAV free ✓ Nanomaterial free
